Amount of labor performed by agents,	\$1,379 76
--------------------------------------	------------

We would recommend the following appropriations for the coming fiscal year :

State tax,	\$845 00
County tax,	650 00
Support of schools,	700 00
Highways and bridges,	1,000 00
Breaking roads in winter,	400 00
Ordinary town charges,	700 00

We sincerely hope the tax payers will stop at the town meeting and look after the appropriations, that they may be liberal and judiciously, and not extravagantly made, sufficient to meet the needs of the town ; that there may be less kicking and fault-finding after the tax list has been placed in the hands of the collector. This is business that should not be neglected.

BREAKING ROADS.

The exceedingly large fall of snow and the high winds caused a heavy expense in opening the highways. The amount expended for the winter was \$565.66.

The present system of repairing the highways, takes the responsibility from the Selectmen, the wisdom of which is to be demonstrated in the future. Quite a number of our bridges and sluiceways have been rebuilt at large expense, which lessened the amount to be used upon the highways, and we consider them all in a safe condition. We would suggest that the embankments should be looked after and railed immediately to protect the town from liability, that the dangerous and bad places be repaired first. We think \$1,000 judiciously expended will keep our highways in first-class condition. The first of last May found our roads badly washed, and the outlay was quite large, and before the roads were all brought up uniformly, the appropriation was exhausted. There were yet needed repairs in order to fix for winter.

Upon the petition of O. Sprague and others, we laid out and caused to be built 112 rods of road on the southerly side of Silver Lake, at a cost of \$61.50. Building is still going on at a cheerful rate, these resorts are an encouraging factor in our town affairs, and their needs have been fairly considered.

Respectfully submitted,

THOMAS H. WHITE,
EDWIN P. HUNT,
SELDEN P. TUTTLE,

Selectmen of Harrisville.

We desire to call the attention of the town, to the fact that there is a necessity of additional room for the use of the public library. The shelf room is not sufficient for the proper arrangement of books, and it is not feasible to enlarge the shelf room to any extent. It should be stated that the library room is occupied as an office by the selectmen, as a place of meeting for the transaction of business and as a deposit for their books and papers, and the safe containing the records of the town is also in the library room. We would respectfully suggest that

the lockup be removed to some other place and the room now occupied for the lockup be added to the library room. And as a further reason, it is difficult to effect an insurance on the library building and library from the fact that a portion of the building is occupied for the detention of disorderly persons and for lodging of tramps.

We would earnestly and respectfully request the town to take such steps as seems to us necessary to make it more suitable for the uses of the public library.

In conclusion we desire to express our satisfaction to Mrs. L. M. Tuttle, who has so acceptably performed the duties of librarian the past year.

REPORT OF THE SCHOOL BOARD.

The school board of the town of Harrisville would respectfully present their annual report :

The first term of the year was the Grammar school in charge of Miss Mary L. Moulton of Newburyport, Mass. This was not her first appearance here as a teacher. She is an excellent instructor, and the school made good progress. We must say, however, that the order during the last part of the term was not as good as it should have been. Some of the older scholars seemed to try to take advantage of the teacher's amiable nature. The second term of the Grammar school was taught by Miss Mary A. Whitcher of Woodsville. The teacher has not only the ability to teach but also to govern. If it was not for the fact that here as soon as children arrive at the age of sixteen years, they are taken almost invariably from the school and placed in the mills, this school in point of scholarship would compare favorably with any school in the county of scholars of the same age. A gentleman visited this school the past winter who has spent almost a lifetime in educational work, and as an educator stands as high as any person in this state, publicly stated that this was the best village school he was ever in. Two years more of schooling would give most of these scholars sufficient education for all ordinary vocations. We think the age of compulsory attendance should be extended to eighteen years.

FIRST PRIMARY.

This school numbered fifty scholars and was taught by Miss Moulton, late of the Grammar school. For the large number of pupils and the great diversity in their ages and acquirements the school made as good progress as could reasonably be expected. Fifty scholars for one teacher is too large a number, but with the limited amount of money at our disposal, we did not feel justified in engaging an assistant.

The second term of the Primary had the benefit of the natural aptitude and experience of Miss Whitcher. The comments we made upon the first term will be applicable to the second one.

CHESHAM SCHOOL.

Mrs. L. F. Shepherdson of this place taught this school for the entire year. Here was a practical illustration of a school kept by the teacher, without any assistance from outside or inside the school-room; — the right person in the right place. She literally brought order out of chaos. The year before there were more than three hundred marks of tardiness; this year none. Upon the roll of honor last year, four; this year more than two-thirds of the entire school. The average attendance was but a small fraction less than the whole number of scholars. Now we might stop right here and say this must have been a good school, for the constant attendance is good evidence of the fact. In the deportment of its scholars it was without criticism; and many of the recitations were models of accuracy and promptness, while all tried to do their best. Some of the scholars here learn quite easily, while with others the reverse is true. It is frequently the case that the latter are quite as deserving as the former. We observed that this teacher made extra exertions to help those to whom learning comes so hard. At the close of the fifth week of the winter term the teacher was taken sick and the school was closed. This was a great misfortune. As the winter was well advanced and considerable sickness prevailed in the place, it was thought best to let the school remain closed.

EAST HARRISVILLE SCHOOL.

Miss Fannie I. Bennett of Whately, Mass., was engaged for this year, but at the close of the seventh week of the second term, she was compelled to leave on account of sickness. Miss Bennett is a teacher of considerable experience, and her industry and pains-taking were distinctly manifest at the close of her schools. After Miss Bennett's resignation, Charles A. Howard of Hancock was employed to finish the school. Although this was his first attempt at teaching, he did good work, and showed him-

self well adapted to the requirements of the school room. We believe this school was completely satisfactory to all concerned.

In concluding our report, we would congratulate the citizens of the town upon the success of their schools the past year. The instruction has been of a much higher order than usual, and we are pleased to note a greater amount of interest taken by the parents, and a more ready obedience on the part of the scholars, to comply with all just regulations in the school room. We are aware that much remains yet, to be accomplished, but we think we are justified in saying that our schools are all in good condition.
